WATER QUALITY MATTERS

LEARN HOW YOU CAN HELP KEEP YOUR WATER CLEAN

Quality you can trust. Ever wondered how we keep your water safe? Our municipality regularly conducts comprehensive testing to monitor water quality. The Lead and Copper Rule also requires water systems to collect an inventory of the service line materials connected to private residences as an extra measure to ensure clean water. Learn how we're meeting these requirements and how you can help by connecting with us at the channels below.

We're in this together 🤝 Learn more about your water quality and connect with us the following ways:
